HAZARDOUS SUBSTANCE STATEMENTS

- Causes skin irritation
- Causes serious eye irritation
- Harmful to aquatic life with long lasting effects

Read label before use; wash hands thoroughly after handling and before eating; wear gloves, clothing, eye and face protection IF ON SKIN – wash with plenty of soap and water; if skin irritation or rash occurs, get medical attention or advice; take off contaminated clothing and

wash before re-use; IF IN EYES – rinse cautiously with water for several minutes; remove contact lenses, if present and easy to do; continue rinsing; if eye irritation persists, get medical attention or advice; dispose of in a suitable landfill or agricultural recycling scheme in accordance with local regulations. Avoid unintentional release to the environment. Avoid contaminating waterways. Do not discharge the product into drains or sewers.

Classified as hazardous according to the criteria of the Hazardous Substances (Hazard Classification) Notice 2020. HSR002578 - Food Additive and Fragrance Materials (Subsidiary Hazard) Group Standard 2020 – (animal repellent).

24-hour Emergency Telephone Number - for advice contact the National Poison Centre - 0800 POISON (0800 764 766) - or a doctor, immediately. For specialist advice in a spill emergency only, call 0800 CHEMCALL (24hrs) or 0800 243 6225. In a transport emergency dial 111.

DIRECTIONS FOR USE Use only as recommended

Although this remedy has been extensively tested under a large variety of conditions, Avian Enterprises Limited does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic and storage conditions; quality of dilution water, compatibility with other substances not indicated on the label and the occurrence of resistance of the pest against the remedy concerned as well as by the method, time and accuracy of application. Avian Enterprises Limited furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animal or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier immediately in the event of any uncertainty. In drought conditions or where no alternative food source is available, efficacy of AVIAN CONTROL® might reduce suppression of bird damage.

SPRAY APPLICATION DIRECTIONS:

Use this product in areas to repel birds that congregate in large numbers, including these passerine birds: starlings, gulls, and rock dove and domestic pigeons, cliff swallow, house (English) sparrow, house finch, as well as these wild migratory waterfowl: geese, mute swan, and coot.

SPRAY WATER: Do not apply Avian Control in muddy water; **Very Important: Use only water with pH value of pH 7.** Water with pH values outside the prescribed range, should be treated with a buffer product to bring the spray mixture to the recommended range of pH 7.0.

GROUND APPLICATION:

- Apply AVIAN CONTROL® using appropriate ground spray equipment.
- Withhold treatment until crop is susceptible to bird damage.
- Do not apply when crop is wet or rain is expected. Addition of Umbrella™ at label rates will improve rainfastness.

- Do not apply through any type of irrigation system.
- Product is best applied diluted while continuously agitated.
- Apply in 200-1,000 L water/hectare depending on application equipment and vegetation density. Apply the spray mixture so that the crop receives thorough coverage.
- Refer to recommended crop application rates in table.
- AVIAN CONTROL® may be applied up to the day of harvest (Pre-Harvest Interval = 1 days) but note the recommendation for PHI and MRL's below.
- Repeat treatment at 8-10 day intervals if significant bird damage begins to occur.
- Do not apply more than 35 litre per hectare per application.

CROP	RATE	REMARKS
Kiwifruit (spring buds)	300 mL/100 L water	Apply in 700-1,000 L water/ha. Apply at first sign of damage and re-apply every 8-10 days.
Stone fruit – Peaches and Nectarines		
Stone fruit – Cherries		
Pome fruit – Apples and Pears		
Berries – Grape (Table & Wine)	300 mL/100 L water	Apply in 700-1,000 L water/ha. Apply at Veraison or when "Brix reaches 18 to 20. Reapply every 8-10 days.
Cereals & Maize	2.0 L/ha	Apply in a minimum water volume of 200 L/ha. Apply at first sign of bird damage and re-apply every 8-10 days.
Strawberries	2.3 L/ha	Apply in a minimum water volume of 200 L/ha.
Sunflowers		Apply at first sign of bird damage and re-apply every 8 to 10 days.

PHI, MRL's and WP:

The withholding period (WP) – the minimum number of days between last application and when the crop can be grazed by animals is 1 day. Pre-harvest interval (PHI) the minimum time period that must elapse between the last application and harvesting the crop is 1 day. This ensures residue levels in the crop or harvested product remain below the Maximum Residue Limit (MRL) but this may not necessarily meet levels for export crops. There is a general recommendation to provide for a 7 day PHI for all crops. Consult Grochem for additional information on crops intended for export or subject to any recognised industry wide certification authority or program.

ADDITIONAL PRECAUTIONS:

- Avoid drift of spray onto other crops, grazing, rivers, dams and areas not under treatment.
- Dispose of wash water where it will not contaminate crops, grazing, rivers, dams and boreholes.
- Do not enter treated area for 4 hours or until spray deposit has dried unless wearing protective clothing.
- Clean the applicator after use.
- TRIPLE RINSE empty containers in the following manner: Invert the empty container over the spray or mixing tank and allow draining for at least 30 seconds after the flow has slowed down to a drip. Thereafter rinse the container three times with a volume of water equal to a minimum of 10% of that of the container. Add the rinsing to the contents of the spray tank before destroying the container in the prescribed manner. Dispose of this product only by using according to the label, or

through the Agrecovery® Chemical Recovery service or other approved facility. Do not burn product or container.

- Do not re-use the empty container for any other purpose.
- Prevent contamination of food, feeds, drinking water and eating utensils.

SHELF LIFE: When stored appropriately, this product should show no significant degradation for 2 years from the date of manufacture (D.O.M.). Contact your supplier for further information about the use of any product that is older than this.

WARRANTY NOTICE: The directions for use of this product are believed to be adequate and must be followed carefully. To the extent consistent with applicable law, Avian Enterprises Limited does not make, nor does it authorize any agent or representative to make any oral or written warranty, guarantee, or representation, express or implied, concerning this material or the use there of beyond the statements of the label. To the extent consistent with applicable law, neither Avian Enterprises Limited nor the seller shall be held responsible in any manner for any claim of personal injury or property damage or loss resulting from handling, storage, or use of this material not in accordance with the written directions.

To the extent consistent with applicable law, the buyer assumes all risk and liability resulting from handling, storage, or use, or purchaser accepts and uses this material on these conditions. No other warranty exists.

SAFETY DATA SHEET: A Safety Data Sheet (SDS) is available from Grochem on request.
