**CONDITIONS OF SALE:** Grochem®, a brand of ADAMA New Zealand Limited (Grochem) will not accept any responsibility whatsoever and howsoever arising and whether for consequential loss or otherwise in connection with the supply of these goods other than the responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by the Statutes applicable

to the sale and supply of these goods. To the extent allowed by such Statutes the liability of Grochem is limited to the replacement of the goods or (at the option of Grochem) the refund of the price paid and is conditional upon a claim being made in writing and where possible sufficient part of the goods to enable proper examination being returned to Grochem within thirty days of delivery.

### DIRECTIONS FOR USE

Boost-It Plus has been developed as a foliar feed for foliar application to horticultural crops for early and mid season use. It should be used as part of a season long foliar programme and should also be applied before and after periods of stress such as drought, low temperatures, excess rain, etc. It is designed to be absorbed by plant foliage and will not burn or scorch plant growth when applied at recommended rates.

Contains the growth stimulant TRIACONTANOL (0.001%).

### MIXING INSTRUCTIONS

1. Add one quarter of the spray water to the tank and begin agitation.
2. Either pre-dissolve the powder in 5 times its volume of water or add to the inlet screen of the spray tank and wash into the spray tank with the remainder of the water.
3. Add any trace elements next starting with solids, then dispersions and finally solutions.
4. Lastly, add any chemicals.
5. Apply immediately. Do not store mixed chemicals.

Note: where a product datasheet specifies that the products should be added in a different order than above i.e. copper hydroxide etc, then follow those instructions. If any doubt about compatibility or if unfamiliar chemicals are being used, then a trial mix is recommended.

### APPLICATION RATES:

CROP	USE RATE	WATER RATE
Pipfruit, Kiwifruit, Citrus, Avocado, Grapes, Stonefruit	3-5kg/ha	Conventional minimum water rate 100L/ha. Aerial spraying minimum water rate 60L/ha.
